

Expression Blend Animation

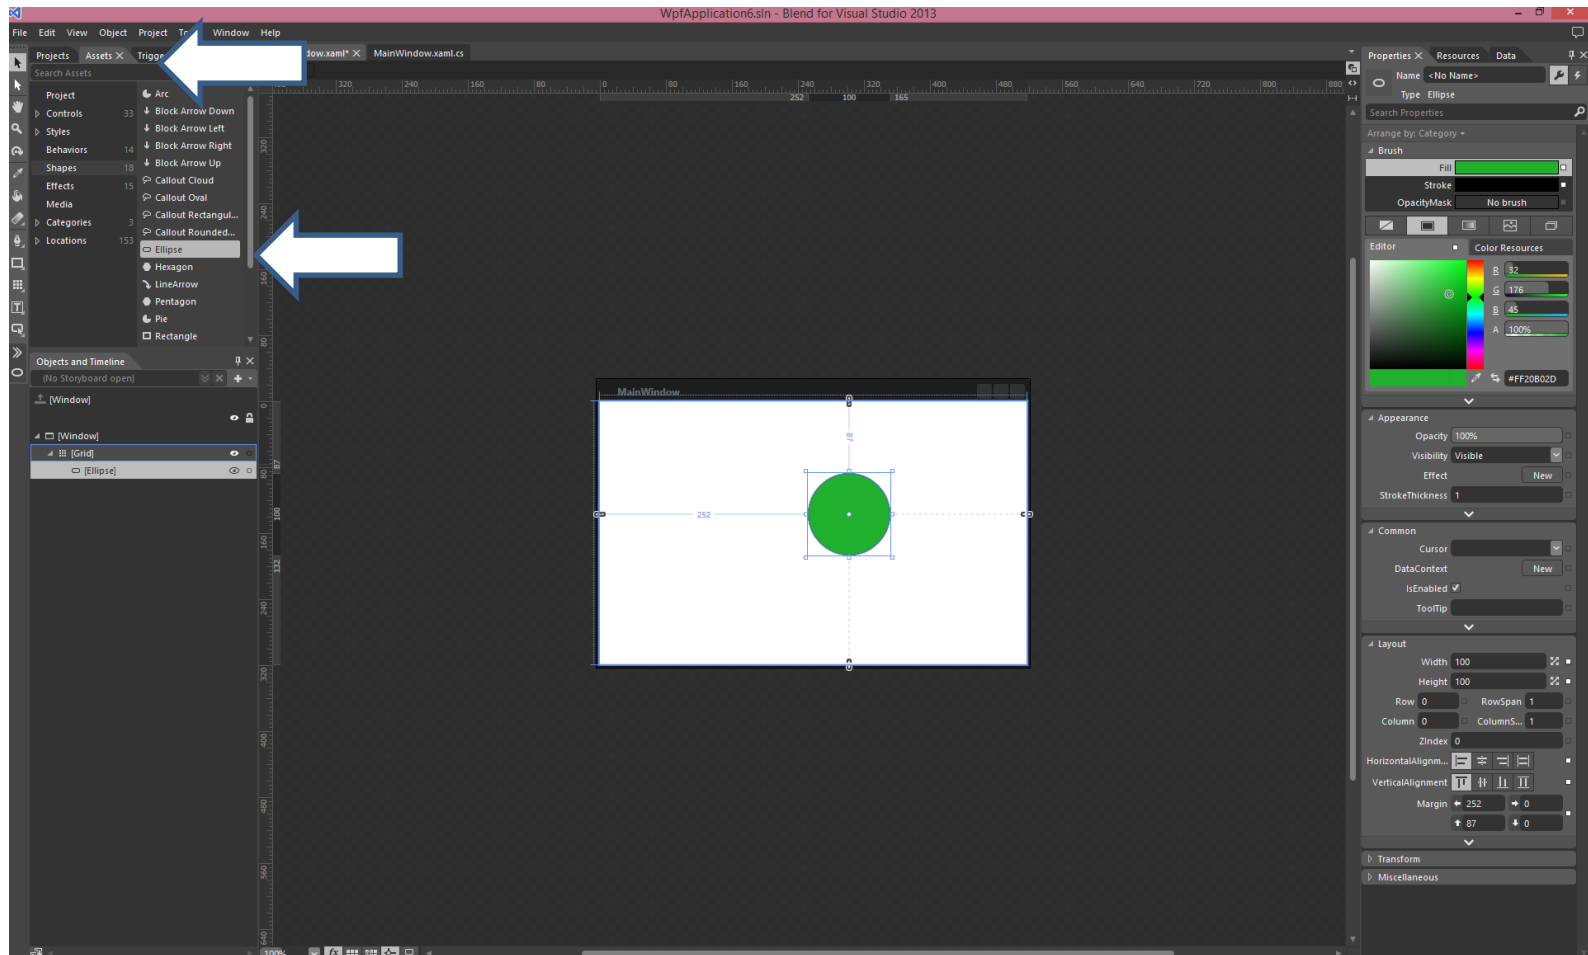

How to create an animation?

→ New Project

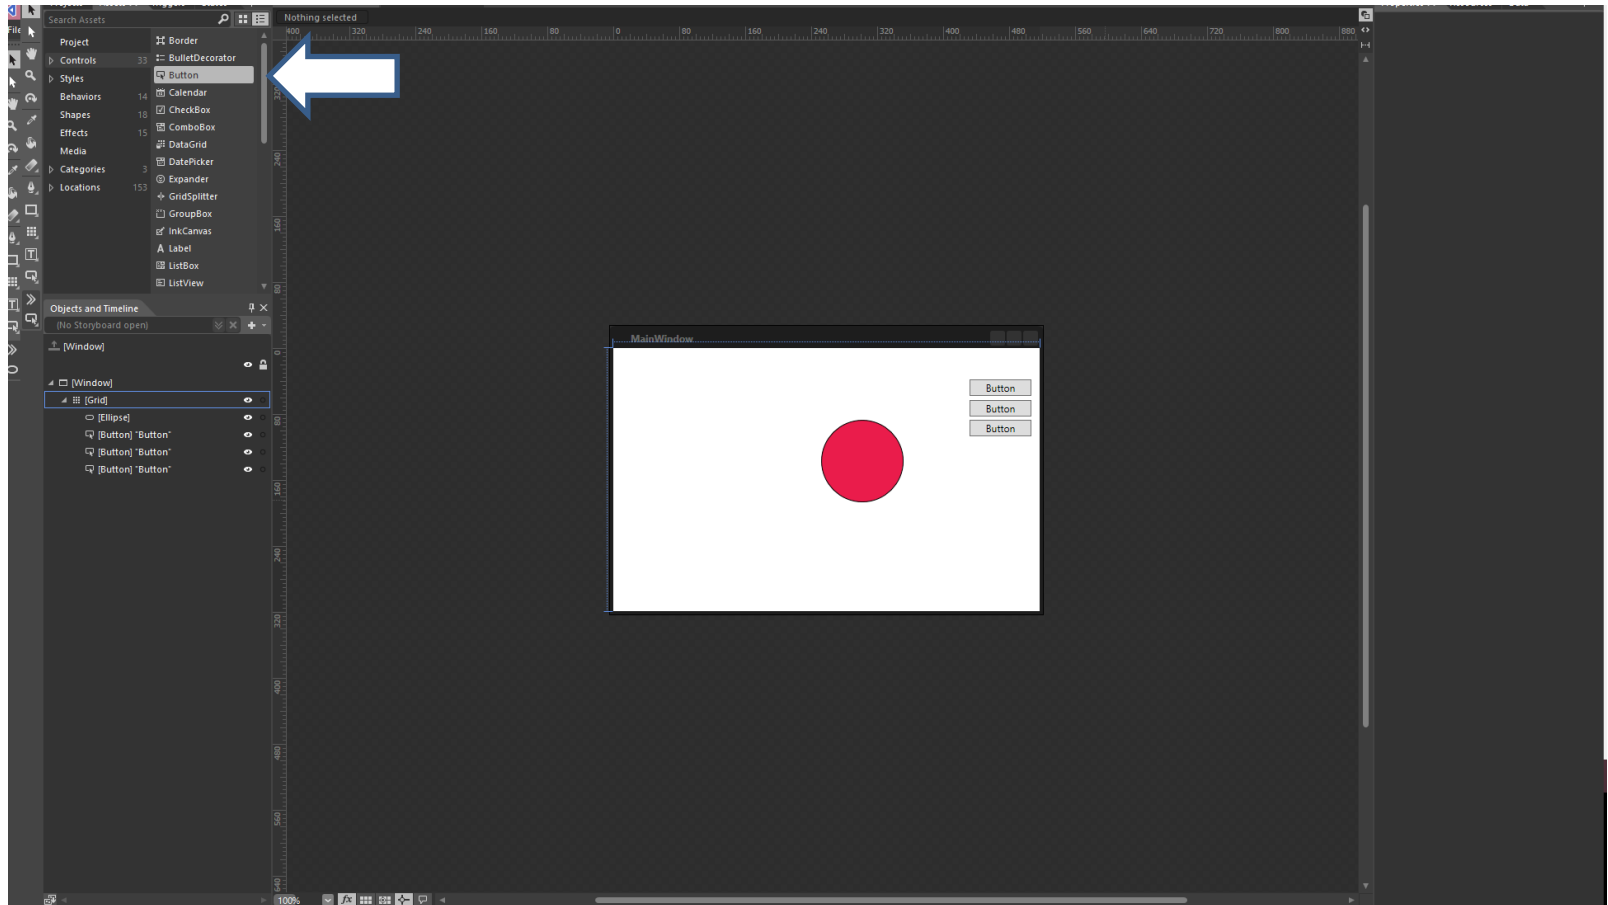

→ Choose WPF

→ Name it and Hit Ok

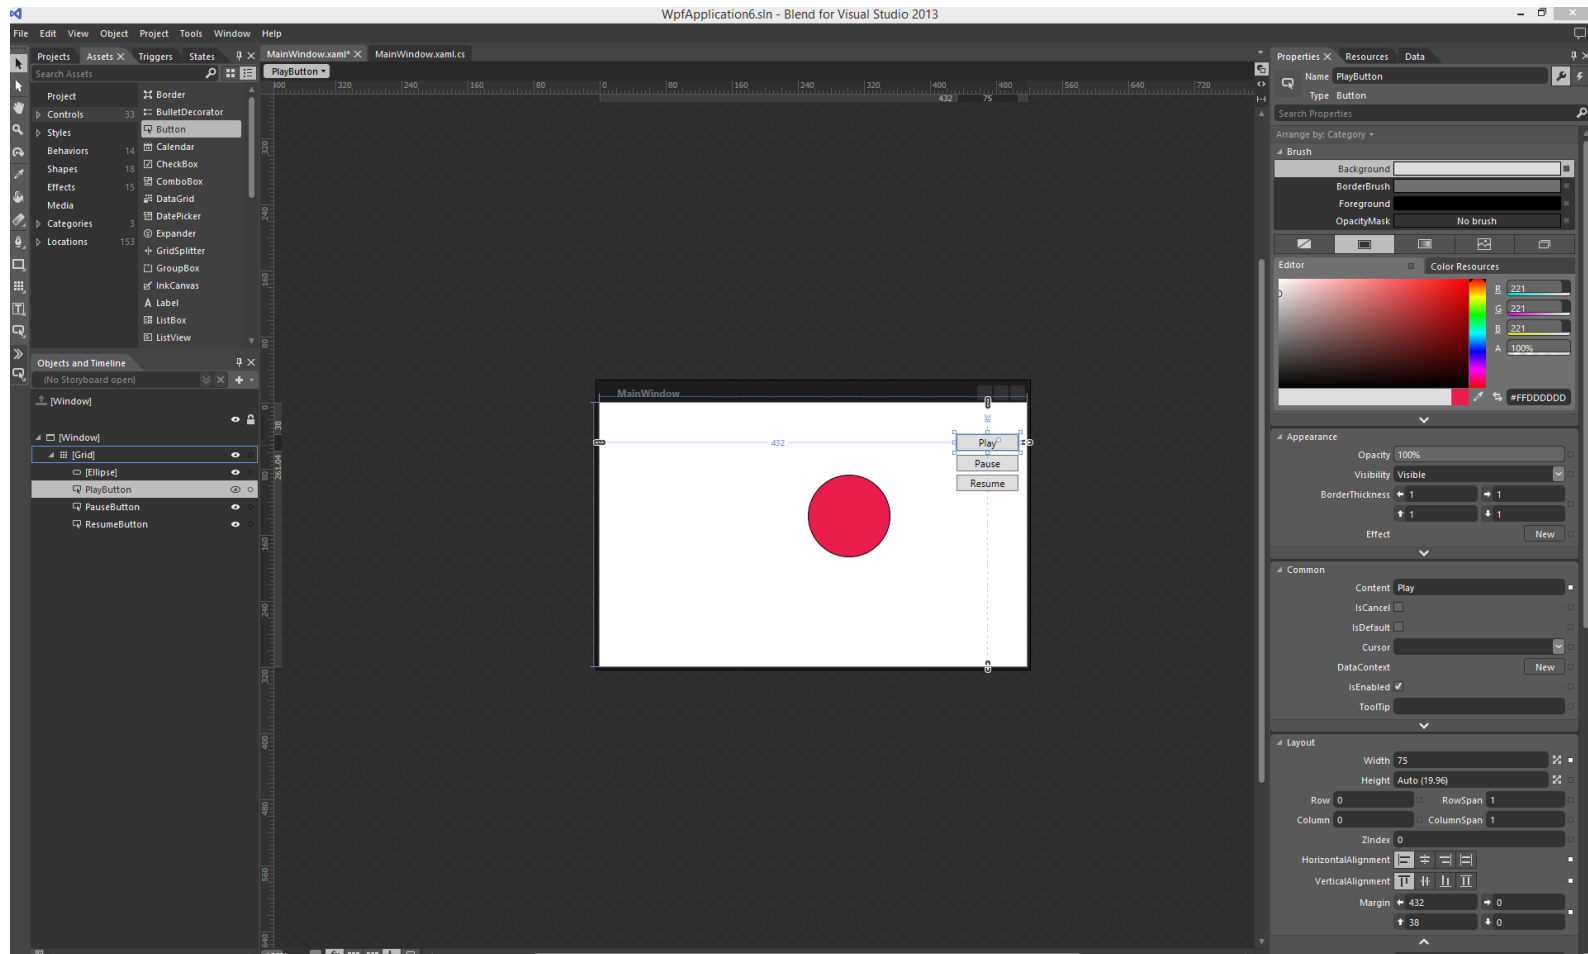

Assets → Shape → Ellipse

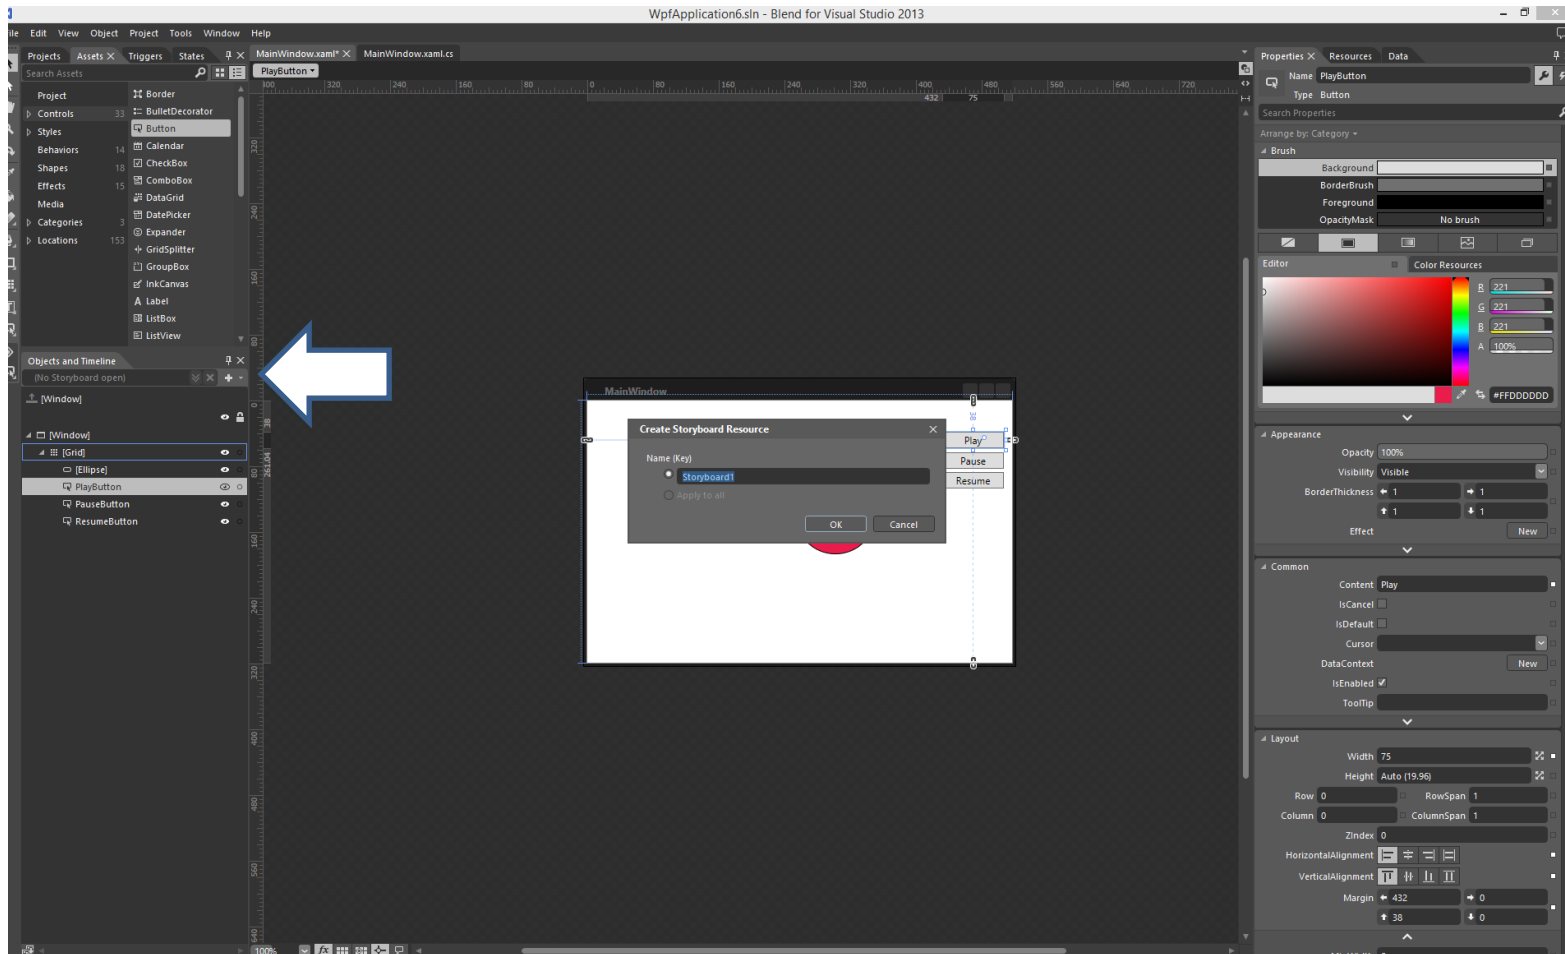

Assets → Control → Button

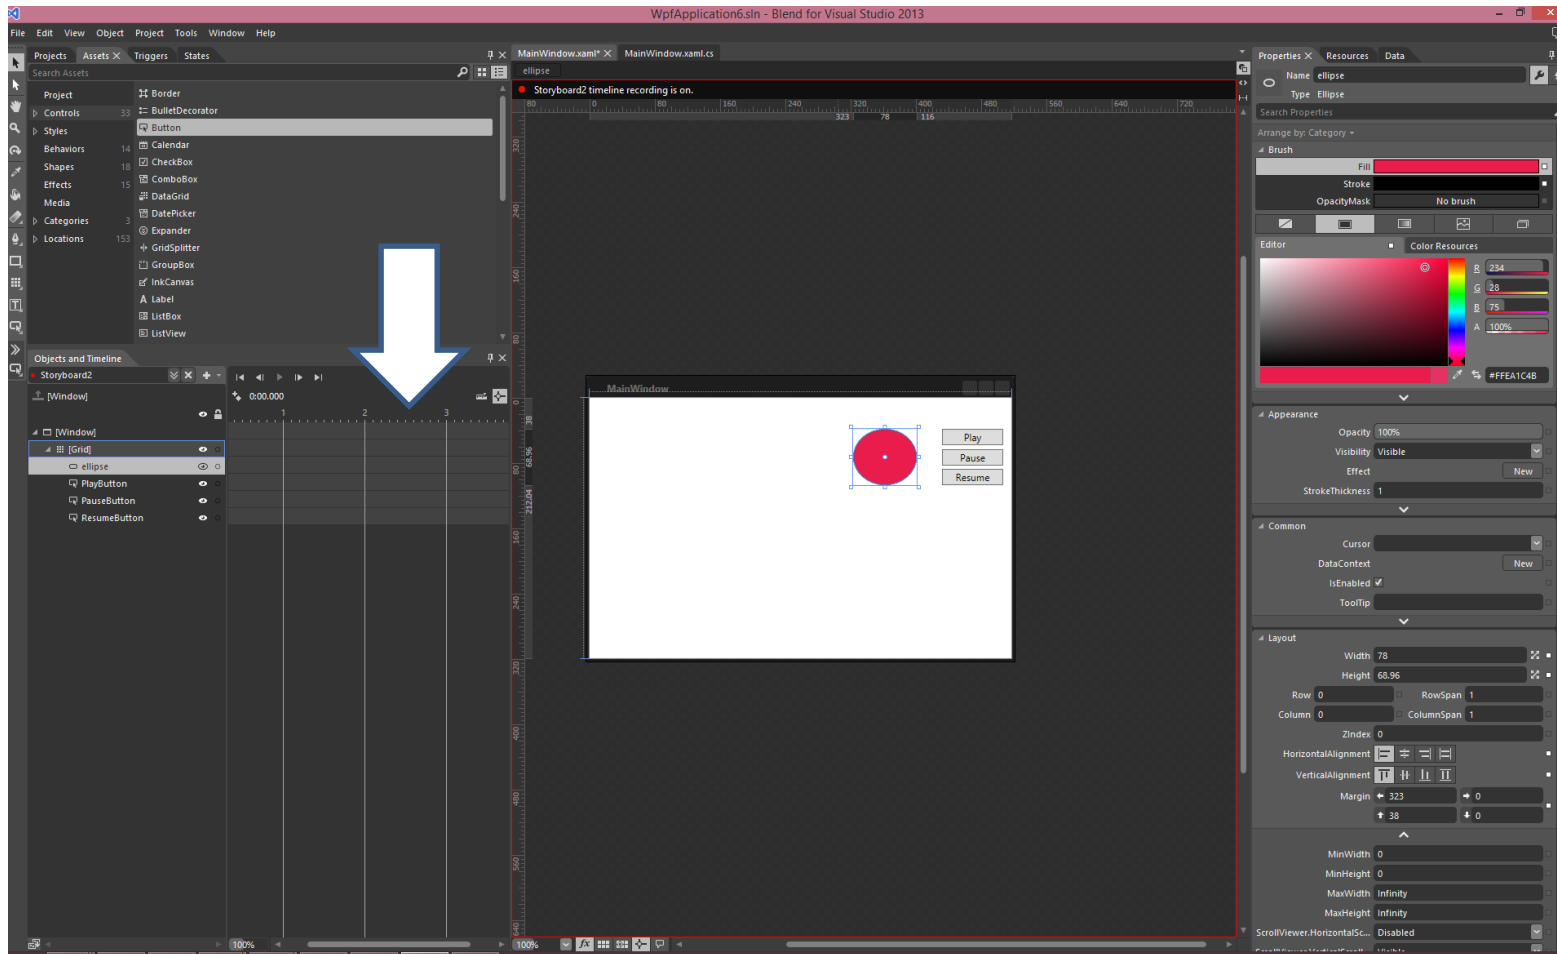

Name the Buttons & Change their Content

Click on + → Create Storyboard

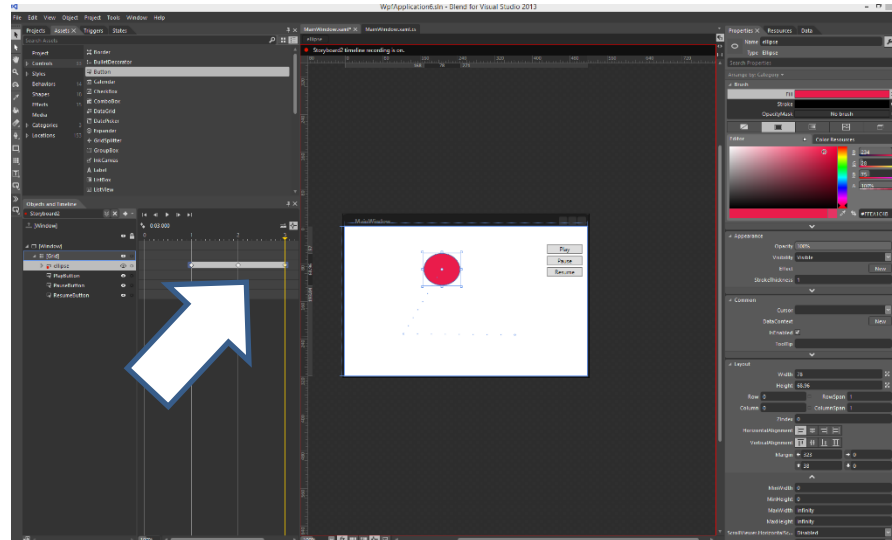

See Key Frame Editor

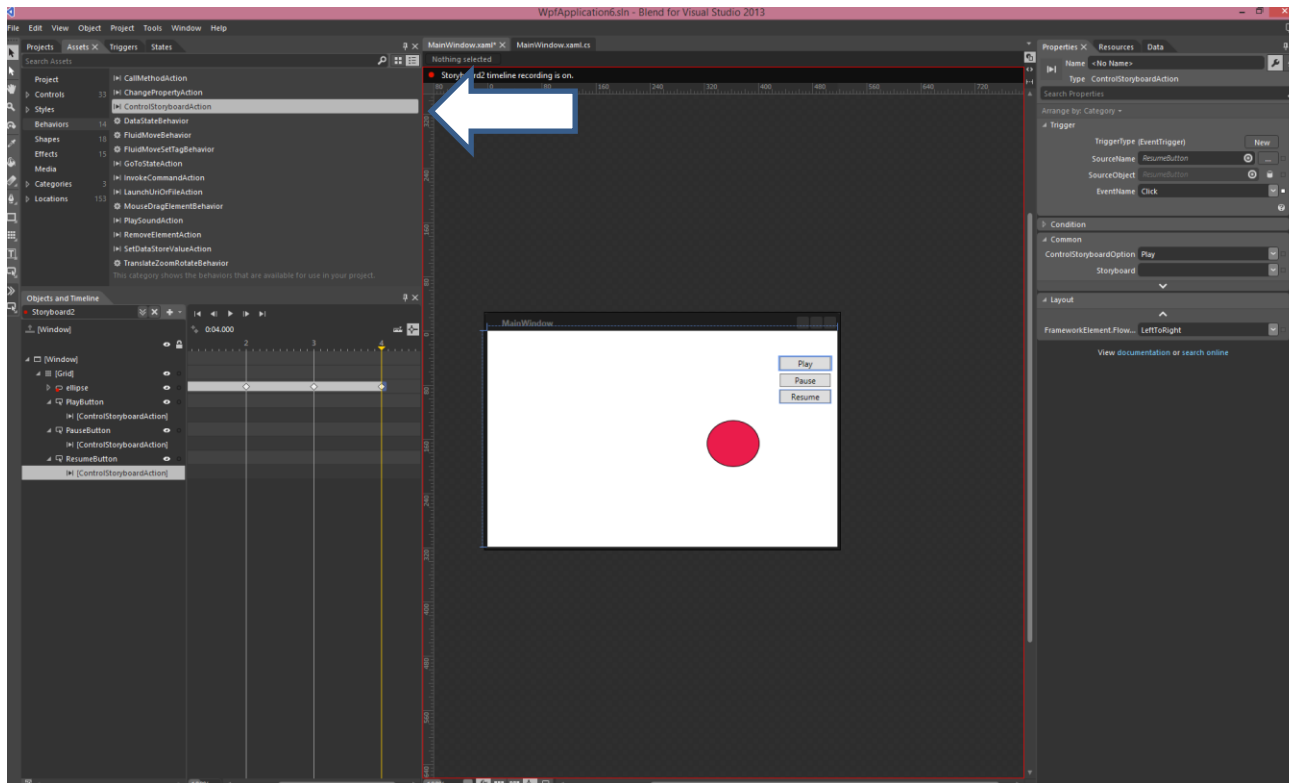

Animate

1. Click on the yellow line
2. Move it to the next step (step #1) – 1 second
3. Animate the circle
4. Repeat 1-3 for the rest of the animation

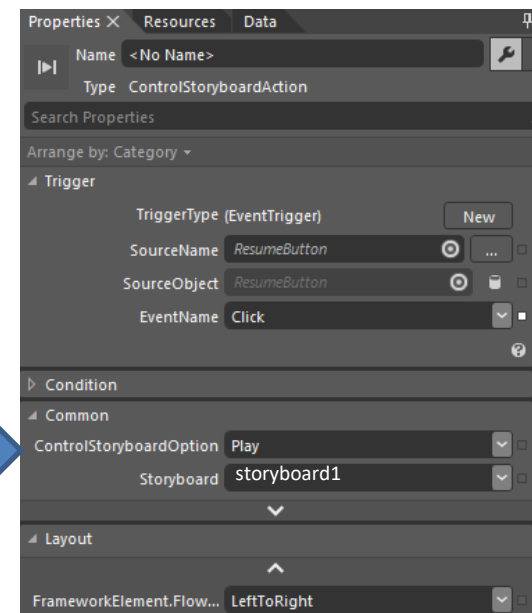

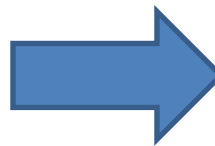

Assets → Behavior

→ Drag “ControlStoryboardAction” and Drop it on all three buttons one by one.

- Go to Properties -> Common -> select your button
- In the common section -> select Play for play button, Pause for pause button & Resume for resume button
- Make sure you have selected your storyboard

Run the project

- Press F5 or
- Go to Project -> Run Project
- Let the ball play once
- Play another time, try Pause & Resume buttons

MainWindow View
