Education

University of Calgary, PhD Candidate in Computer Science

Canada

Thesis: Design & develop technology and software to improve doctor-patient communication, 2014–Present

Graduation Expected Date: Summer 2018.

Supervisors: Dr. Sheelagh Carpendale and Dr. Lora Oehlberg.

Member of Interaction lab and Innovis lab groups at the University of Calgary.

Australian National University, Master of Computer Science

Australia

Thesis: Interface designs for iPads with different screen sizes,

2010–2012

Supervisors: Dr. Tom Gedeon and Dr. Duncan Stevenson

University of Tehran, Bachelor of Software Engineering

Iran

Thesis: Finding Social Network Graphs in News Websites,

2006–2010

Supervisor: Dr. Masoud Asadpour

Research Interest

Information Visualization, Human Computer Interaction, Software Engineering

Data Analysis and Visualization, Patient Data, Personal Informatics,

Personal Visualization, Health Informatics,

Collaboration

Ward of the 21st Century, Alberta Health Services (Since Aug 2015). W21C is a research institute working with academia, government, and industry to bring new ideas into health care. I was involved in an innovative project for designing a care plan for patients with chronic conditions. As part of this project, as a group we conducted extensive literature review and field studies understanding patients' and physicians' needs to inform our design process.

Pain Studies Lab, SIAT, SFU (Sep 2014 - Sep 2015). The Pain Studies Lab was founded and is directed by Dr Gromala. In this lab, the research group studies, invents and designs technologies for people who live with persistent pain, their pain physicians and healthcare professionals. I was a visitor in this lab for a year collaborating with Dr. Gromala and her students in several projects.

Thesis

Fateme Rajabiyazdi. Design and development of interface for different tablet sizes. *Master Thesis*
I manipulated a 17-inch MacBook configuration to a tablet mock-up. I designed and developed a new interface for the tablet mock-up and later I evaluated the design in a lab study setting. , School of Computer Science, Australian National University, 2012.

Fateme Rajabiyazdi. Finding Social Network Graphs in News Websites (Balatarin.com), *Bachelor Thesis*, School of Electrical and Computer Engineering, University of Tehran, 2010 (in Persian).

Teaching Experience

Introduction to Information Visualization - CPSC583

University of Calgary

Guest Lecturer

Fall 2017

I was invited to present guest lectures on principles of designing visualization. To give students a first-hand experience, I ran activities asking students to critique sample visualization designs and sketch new visualization designs in a group. I believe for teaching software engineering and computer science running hands-on activities will create a more active environment for students to learn the new concepts.

Visualization and Visual Analytics - CPSC599

University of Calgary

Guest Lecturer

Winter 2016

During my guest lecture for this course, I delivered materials on how to use Python to run stats. I provided students with an initial code framework and while I was running a live demo for them, I have asked them to start filling the blanks in the code framework at the same time. This will give the students an opportunity to get involved, make mistakes, and ask questions.

Introduction to Information Visualization - CPSC583

University of Calgary

Teaching Assistance, Third and fourth year computer science students

Fall 2017

Instructor: Dr. Sheelagh Carpendale

During the tutorials for this course, I prepared materials for tutorials teaching students about different visualization concepts and the most commonly used algorithms for designing a visualization such as force-directed graph and reingold-tilford tree algorithms. In addition, I taught students how to program with JavaScript and D3 to make their own visualization for their assignments and course projects.

Thinking with Data - SCIE201

University of Calgary

Teaching Assistance, Open to none-computer science major students

Summer 2017

Instructor: Dr. Nelson Wong

The goal of this course was to familiarize students with the process of data collection, data cleaning, and data presentation. The department of Computer Science offered this course for the first time and because of my previous experience with teaching other data science and analytics courses, I was invited to tutor for this course. I outlined all the course assignments and helped the instructor in designing the course projects. I have designed and delivered materials and activities for two 3-hour tutorial sessions weekly. During the tutorials, I grouped the students and led them for their course projects with weekly feedback.

Visualization and Visual Analytics - CPSC599

University of Calgary

Teaching Assistance, Third and fourth year computer science students

Winter 2016

Instructor: Dr. Wesley Willett

In fall 2016, department of computer science offered this course for the first time. I ran the tutorial sessions for this course, marked students' projects, and helped the instructor of the course with outlining the assignments. I taught students how to use visualization software such as Tableau and Wrangler. In addition, I delivered materials teaching statistics using Python and R.

Human Computer Interaction - CPSC481

University of Calgary

Teaching Assistance, Third and fourth year computer science students

Winter 2015

Instructor: Dr. Ehud Sharlin

For this course, I was responsible to lead ten students' projects during the semester. I guided students through the entire cycle of task-centered system design technique to design and evaluate interfaces based on the real-world tasks. Mentoring student groups involved helping students scope their projects, teaching them how to conduct interviews and identify tasks, teaching C# and WPF, helping with technical problems, regularly meetings with student to discuss problems and suggest possible alternatives to improve the interface design. Finally, I evaluated the projects through review of their portfolios and final project demonstrations.

Introduction to CS Application Software - CPSC203*Teaching Assistance, First year non-computer science students*

Instructor: Dr. James Tam

University of Calgary*Winter 2014*

This course is offered in the department of Computer Science with the goal of familiarizing students not majored in computer science with basic computer science software such as Microsoft Excel and Microsoft Access. I ran weekly tutorials, each week introducing a new concept such as conditional formatting and conducting hands on activities working with the software.

Ecommerce*Teaching Assistance, Second year computer science students*

Instructor: Dr. Chris Johnson

Australian National Uni.*Winter 2012*

For this course, I ran weekly tutorials engaging students in discussing how technology is changing global commerce and how to create new opportunities. I helped students with their projects and taught web programming.

Microprocessor*Teaching Assistance, Second year software engineering students*

Instructor: Dr. Omid Fatemi

University of Tehran*Winter 2009*

For this course, I was responsible with leading students' group projects from helping them define their topic, implement the hardware, test and evaluating the hardware. Each week, I gave students feedback on their project and helped them with building the hardware.

Experience

Lexdata - Junior Web developer*Manager: Michael Hall*

Lexdata is a document and information management company that provides specialist solutions to law firms, government departments and corporate organisations around Australia. As a web developer, I was working on designing and developing accessible websites using JavaScript, HTML, XML, and CSS.

Australia*2012-2013***CSIRO - Research Assistance***Supervisor: Dr. Matt Adcock*

The Commonwealth Scientific and Industrial Research Organization is the federal government agency for scientific research in Australia. During my visit, I was involved in the process of designing a controlled user study for a large screen technology to evaluate the use of iPad in people's personal view on the screen in a collaborative setting.

Australia*2012***Australian National University - Intern***Supervisor: Dr. Rob Mahoney*

During my internship, I worked on developing code with MATLAB for nonlinear attitude filter to remove noise in the data. I worked with attitude kinematics on the group of rotation matrices and the unit quaternion.

Australia*2009*

Scholarship and Awards

Computer Science Dept. Research Award: University of Calgary, \$11,000	<i>01/2018 - 04/2018</i>
Ward of 21st Century, Alberta Health Services: \$30,000	<i>08/2016 - 08/2017</i>
Ward of 21st Century, Alberta Health Services: \$30,000	<i>08/2015 - 08/2016</i>
Computer Science Dept. Research Award: University of Calgary, \$8,000	<i>09/2016 - 04/2017</i>
Faculty of Graduate Studies Travel Award: University of Calgary, \$1,000	<i>07/2015</i>
Computer Science Dept. Research Award: University of Calgary, \$2,000	<i>09/2015 - 04/2016</i>
Awarded 4th at Microsoft Imagine Cup: University of Calgary	<i>2014</i>
Computer Science Dept. Research Award: University of Calgary, \$8,000	<i>09/2014 - 04/2015</i>

Academic Services

Mobile App Chair: Interactive Surfaces and Spaces Conference 2016

In charge of creating and maintaining the conference website.

Best Poster Award Committee: IUI 2015

In charge of selection the best poster and honorable mention awards.

Student Volunteer: CHI Conference 2018 and 2016, ITS Conference 2015, OZCHI Conference 2011

In charge of IT technical supports during the conference sessions.

Paper Reviewer: AMIA, TEI18, CHI18, CHI17, CHI16, CHI15, ITS15, IUI15, CHI14, OZCHI12

Reviewed a range of papers short and long papers, posters, and workshops.

Master Student Representative Council: Australian National University, 2011

In charge of representing Computer Science master students and echoing their voice to the university.

Robogal Student Chapter Volunteer: Australian National University, 2011

In charge of helping with running robotic workshops.

ACM Student Chapter Secretary: University of Tehran, 2008 - 2009

In charge of running technical and programming workshops and advertising them to students.
